I am a **Full-stack developer** with experience in building **responsive frontends** and **reliable backend systems**. I enjoy solving **real-world problems** through **clean, maintainable code**. Comfortable working **across the stack**, I **pick up new tools quickly** and **collaborate well** with teams to **ship useful products**.

EDUCATION

B.Tech Computer Science and Engineering

Aug 2021 - May 2025

University Of Petroleum and Energy Studies

Worked as the **Student Placement Representative (SPR)**, helping coordinate placement-related tasks and supporting students throughout the process.

WORK EXPERIENCE

Data Engineer Intern

Jun 2024 - Jul 2024

HERE Technologies

Remote

- Built a **custom web crawler** using **Scrapy** to collect store locations from various retail websites, handling diverse HTML structures.
- Automated** data collection through scheduled **Scrapy spiders**, reducing manual effort and saving around **30%** of operational time.
- Documented the **workflow** and **codebase** to make it easier to maintain and update in the future.

PROJECTS

Revuea – Empowering Honest Feedback with Anonymity [↗](#)

- Built using **React.js**, **Node.js**, **Express.js**, and **PostgreSQL (Prisma)**, **Revuea** is a **privacy-first** full-stack web app where users can get **honest reviews** and feedback.
- Respondents** can fill out the form **anonymously** and give **genuine feedback** without fear of being identified.
- It features **OTP-based signup**, **theme selection**, **Recharts** for visual analytics, **Gemini** powered **AI summaries**, and **CSV export** functionality.

AdaptSense: Empowering the Visually & Hearing Impaired with AI [↗](#)

- Built using **React Native (Expo)**, **Tailwind CSS**, and **Gemini APIs**, **AdaptSense** is a mobile app that helps **visually** and **hearing-impaired** users with smooth **input-output conversions**.
- It supports **four input methods** (**text**, **braille**, **audio**, and **image**) and **four output formats** (**audio**, **text**, **braille**, and **sign language GIFs**).
- The backend uses **Gemini-powered APIs** to handle **13 unique combinations**, improving **accessibility**.

PixScribe - SaaS Text-to-Image Generator Web App [↗](#)

- Built using **React.js**, **Node.js**, **Express**, and **MongoDB**, **PixScribe** is a full-stack web app that lets users generate **AI-based images** from **text prompts**.
- It includes a **credit system** and **Razorpay integration** for payments, so users can **buy credits** and generate more images.
- Designed responsive pages with **Tailwind CSS** and used **Framer Motion** for smooth animations.

AviaGeek: An Aircraft Encyclopedia for Aviation Enthusiasts [↗](#)

- Built using **Next.js**, **Tailwind CSS**, and **MongoDB**, **AviaGeek** is a **Progressive Web App (PWA)** that helps aviation enthusiasts explore aircraft manufacturers and models.
- It includes a **side-by-side comparison** feature to compare different aircraft models by features.
- Added **authentication** with **NextAuth** and a **favorites** section where users can save aircraft models and view them later.

SKILLS

Frontend Technologies: HTML, CSS, React.js, React Native, Next.js, Tailwind CSS, Bootstrap, Framer Motion, Figma, Progressive Web Apps (PWA), JavaScript, Typescript

Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, Prisma

Programming Languages: C++, Python

Data Visualization: Recharts

Payment Gateway Integration: Razorpay, Stripe
