I'm a **full-stack developer** who loves building responsive, user-centric interfaces. I bring a **growth mindset**, thrive in collaborative teams, and adapt quickly to new tools. I focus on writing clean, maintainable code to build **impactful digital products** that solve real-world problems.

EDUCATION

B.Tech Computer Science and Engineering

Aug 2021 - May 2025

University Of Petroleum and Energy Studies

Served as the **Student Placement Representative (SPR)**, assisting peers with career guidance and placement opportunities while gaining leadership and teamwork experience.

WORK EXPERIENCE

Frontend Developer Intern

Nov 2024 - Dec 2024

Quality AI

Remote

- Built **DermaGlow AI**, a **Progressive Web App (PWA)** that delivers **AI-powered personalized skincare routines** using **Next.js**, **Tailwind CSS**, and **Gemini API**, improving user accessibility to expert guidance.
- Designed and implemented **dynamic UI/UX interactions** with **Framer Motion**, enhancing **user engagement** through smooth transitions and animations.
- Integrated **form-based AI workflows** that analyze user input and images to generate tailored skincare insights using **Gemini's multimodal capabilities**.
- Boosted performance and user experience with PWA features like **offline support**, **lazy loading**, **code splitting**, and optimized rendering, reducing page load time and ensuring **seamless experience** across devices.

Data Engineer Intern

Jun 2024 - Jul 2024

HERE Technologies

Remote

- Built a custom web crawler** using Scrapy to collect store locations and metadata from various retail websites, handling diverse HTML structures with adaptable parsing logic.
- Automated data collection** through scheduled Scrapy spiders, reducing manual effort and saving approximately 30% of operational time.
- Documented workflows and codebase** to ensure maintainability and ease of future updates.

PROJECTS

Revuea – Empowering Honest Feedback with Anonymity [↗](#)

- Designed a **privacy-first, full-stack** feedback service that encourages honest **360° anonymous responses** by hiding **user identity** from form creators.
- Implemented **OTP-based** signup, **form lifecycle management**, **visual analytics**, AI-generated summaries, and **CSV export** for valuable insights.
- Built using **React**, **Node.js**, **Prisma**, **PostgreSQL**, and **Gemini API** — optimized for **clarity**, **simplicity**, and **seamless usability**.

AdaptSense: Empowering the Visually & Hearing Impaired with AI [↗](#)

- Built with **React Native (Expo)**, **Tailwind CSS**, and **Gemini APIs**, AdaptSense is a mobile app that provides seamless input-output conversions for **auditory** and **visually impaired** users.
- Implemented support for four input methods—text, braille, audio, and image—and four output formats: audio, text, braille, and sign language gifs.
- Integrated **backend endpoints** powered by **Gemini APIs** to deliver 13 unique combinations for **enhanced accessibility** and ease of use.

PixScribe - SaaS Text-to-Image Generator Web App [↗](#)

- Built with **React.js**, **Node.js**, **Express**, and **MongoDB**, Pixscribe is a full-stack web app that lets users generate AI-based images from text prompts.
- Added a credit system and integrated **Razorpay** for payments, allowing users to buy credits and track usage.
- Designed responsive pages with **Tailwind CSS** and used **Framer Motion** for smooth animations and transitions.

AviaGeek: An Aircraft Encyclopedia for Aviation Enthusiasts [↗](#)

- Built with **Next.js**, **Tailwind CSS**, and **MongoDB**, AviaGeek is a **Progressive Web App (PWA)** that helps aviation enthusiasts explore aircraft manufacturers and models.
- Implemented a side-by-side comparison feature using **Node.js** and server-side rendering.
- Added authentication with **NextAuth** and a personal dashboard where users can save favorites, with images stored via **Cloudinary**.

SKILLS

Frontend Technologies: HTML, CSS, React.js, React Native, Next.js, Tailwind CSS, Bootstrap, Framer Motion, Figma, Progressive Web Apps (PWA)

Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, Prisma

Programming Languages: C++, Python, JavaScript, Typescript

Version Control: Git, GitHub

Computer Vision: OpenCV

Payment Gateway Integration: Razorpay, Stripe
